

SEMESTER TRAINING (BTCS 801-18) REPORT

on

“SkillSwap Platform”

Submitted in partial fulfillment of requirements for the award of the degree

Bachelor of Technology

In

Information Technology

To

IKG Punjab Technical University, Jalandhar

SUBMITTED BY:

Name: Pankaj Sharma

Roll no.: 2237422

Semester: 8th

Batch: 2022-2026

Under the guidance of

Mr. Kamaljit Singh and Mr. Jashanpreet Singh

Assistant Professor

DEPARTMENT OF INFORMATION TECHNOLOGY

Chandigarh Engineering College-CGC

Landran, Mohali, Punjab – 140307

May 2026

CERTIFICATE

This is to certify that **Mr. Pankaj Sharma** has partially completed / completed / not completed the Semester Training during the period from **Jan 2026** to **May 2026** in our Organization / Industry as a Partial Fulfillment of Degree of Bachelor of Technology in Information Technology.

Signature of Project Supervisor

Date: _____

CANDIDATE DECLARATION

I hereby declare that the Project Report entitled “**SkillSwap Platform**” is an authentic record of my own work as requirements of 8th semester academics as Semester Training BTCS 801-18 during the period from January 2026 to May 2026 for the award of degree of B. Tech. Information Technology, Chandigarh Engineering College-CGC Landran, Mohali under the guidance of **Mr. Kamaljit Singh. and Mr. Jashanpreet Singh.**

Signature of student

Pankaj Sharma

(2237422)

Date: _____

Certified that the above statement made by the student is correct to the best of our knowledge and belief.

Signatures

Head of Department

(Signature and Seal)

ACKNOWLEDGMENT

I take this opportunity to express my sincere gratitude to the Director- Principal **Dr. Rajdeep Singh**, Chandigarh Engineering College-CGC Landran, Mohali for providing this opportunity to carry out the present work.

I am highly grateful to Dr. **Amanpreet kaur** HOD IT, Chandigarh Engineering College-CGC Landran, Mohali for her invaluable support. I would like to express my gratitude to other faculty members of Information Technology department of CEC-CGC, Landran, Mohali for providing academic input, guidance & Encouragement throughout the training period. The help rendered by **Mr. Kamaljit Singh and Mr. Jashanpreet Singh** Supervisor for Experimentation is greatly acknowledged. Finally, I express my indebtedness to all who have directly or indirectly contributed to the successful completion of my semester training.

TABLE OF CONTENTS

CONTENT	PAGE NO.
Certificate	i
Candidate Declaration.....	ii
Acknowledgement.....	iii
Table of Content.....	iv-vii
List of Table.....	viii
List of Figure.....	ix-x
Abbreviation.....	xi
Abstract.....	xii
 Chapter 1: Introduction.....	 1-9
1.1 Background of the Study.....	1
1.2 Problem Statement.....	2
1.3 Objectives of the Project.....	2-3
1.4 Scope of the Project.....	3
1.5 Need of the system.....	4
1.6 Significance of the Study.....	4
1.7 Hierarchy flow of the System.....	4-8
1.8 Limitations for the Current System.....	8
1.9 Summary.....	9
 Chapter 2: Literature Review.....	 10-15
2.1 Introduction to Literature Review.....	10
2.2 Previous Research Work.....	10-11
2.3 Review of Existing Systems.....	11-13
2.4 Comparative Study of Existing Methods.....	13-14
2.5 Research Gap Identification.....	14-15
2.6 Proposed Solution.....	15
2.7 Summary of Literature Review.....	15

Chapter 3: Feasibility Analysis.....	16-21
3.1 Introduction to feasibility Analysis.....	16
3.2 Technical feasibility.....	16-17
3.3 Economic feasibility.....	17-18
3.4 Operational feasibility.....	18
3.5 Schedule feasibility.....	19
3.6 Security feasibility.....	19-20
3.7 Legal feasibility.....	20
3.8 Social feasibility.....	20-21
3.10 Summary of Feasibility Analysis.....	21
 Chapter 4: Software Requirement Specification.....	 22-29
4.1 Introduction.....	22
4.2 Purpose of the system.....	22
4.3 Scope of the system.....	22-23
4.4 Functional Requirements.....	23-26
4.5 Non-Functional Requirements.....	26-27
4.6 Hardware Requirements.....	27-28
4.7 Software Requirements.....	28
4.8 User Requirements.....	29
4.9 System Constraints.....	29
4.10 Summary of SRS.....	29
 Chapter 5: Technologies & Software Tools Used.....	 30-38
5.1 Introduction.....	30
5.2 React.js.....	31-32
5.3 Tailwind CSS.....	32-33
5.4 Node.js.....	33-34
5.5 Express.js.....	34-35

5.6 MongoDB.....	36-37
5.7 Visual Studio Code.....	37
5.8 Postman.....	38
5.9 Git & GitHub.....	38
5.10 Summary.....	38
Chapter 6: System Design.....	39-54
6.1 Introduction.....	39
6.2 Use Case Design.....	39-40
6.3 Data Flow Diagram.....	40-43
6.4 Activity Diagram.....	43-44
6.5 Class Diagram.....	45-46
6.6 ER Diagram.....	47-49
6.7 Database Design.....	49-50
6.8 System Architecture.....	50-51
6.9 Methodology Used.....	51
6.10 Hardware requirements.....	52
6.11 Software Requirements.....	52-53
6.12 Skill Matching Algorithm.....	53
6.13 System Modules.....	53-54
6.14 Implementation Technologies.....	54
Chapter 7: System Implementation & Testing.....	55-66
7.1 Introduction.....	55
7.2 Implementation Modules.....	55-59
7.3 Testing Environment.....	59-60
7.4 Test Cases.....	60
7.5 Performances Analysis.....	60
7.6 Challenges Faced During Testing.....	61
7.6 Result Screenshots.....	61-65

7.8 Summary.....	66
Chapter 8: Conclusion & Future Scope.....	66-70
8.1 Conclusion.....	66-67
8.2 Future Scope.....	67-69
8.3 Discussion of Results.....	69
8.4 Final Summary.....	70
Timelines.....	71
References.....	72

7	API	Application Programming Interface
8	DB	Database
9	JWT	JSON Web Token
10	CRUD	Create, Read, Update, Delete

ABSTRACT

The Online Skill Exchange Platform is a web-based application designed to provide a collaborative environment where users can exchange skills without any monetary transactions. Traditional learning platforms often require payment, which limits access for many students and individuals. This system aims to overcome such limitations by enabling peer-to-peer knowledge sharing.

In this platform, users can register, create profiles, and list the skills they can offer as well as the skills they want to learn. The system matches users based on their interests and enables interaction between them. It ensures a user-friendly interface where individuals can easily navigate, search, and connect with others.

The system is developed using modern web technologies such as React.js and Tailwind CSS for the frontend, and Node.js with Express.js for the backend, along with MongoDB as the database. These technologies provide a scalable and efficient solution for managing user data and interactions. The platform improves accessibility, promotes collaborative learning, and reduces dependency on paid resources.

This project demonstrates how technology can be used to create a sustainable learning ecosystem. It can be useful for students, professionals, and communities where knowledge sharing and skill development are important.
